GENERAL INDEX

Abbot, C. G., The present state of the solar radiation investigations of the Smithsonian Institution (abstract) 161
Albrecht, Sebastian, Intercomparison of the systems of titanium and iron wave-lengths (abstract) 161
Visual observations at the total solar eclipse of January 24, 1925 228
Wave-lengths in β Cephei with dispersions of two and three prisms (abstract) 535
in Class-B stellar spectra (abstract) 162
of three silicon lines in stellar spectra (abstract) 536
Aldebaran, 1925, February 2, Occultation of, *William F. Rigge* 14
Alden, Harold L., Photographic determinations of mass ratios in visual binary systems, (abstract) 164
The long-period orbit of Algol (abstract) 163
Alexander, Jerome, Colloids in the cosmos 420
Algol, Peculiarities in the radial velocities of, *Dean B. McLaughlin*..... 295
The long-period orbit of, *Harold L. Alden* 163
Alter, Dinsmore, Abstract of results of application of Schuster's periodogram, to long rainfall records (abstract)..... 536
A new piece of demonstration apparatus for descriptive astronomy classes 575
Equations modifying Schuster's periodogram (abstract).. 164
American Association of Variable Star Observers—
Annual report of the 688
Monthly report of the 48, 127, 197, 262, 323, 395, 463, 544, 606, 675
American Astronomical Society—
Announcement 488, 623
Reports of observatories (Allegheny, Berkeley, Córdoba, Dearborn, Dominion, Dominion Astrophysical, Dudley, Goodsell, Harvard College, La Plata, Lick) 18-35
Reports of observatories (Leander McCormick, Detroit, Mt. Wilson, United States Naval, Princeton University, Smithsonian Astrophysical, Sproul, Tacubaya, Van Vleck, Washburn, Yale University, Yerkes) 98-121
Reports of observatories (Allegheny, Berkeley, Dearborn, Dominion Astrophysical, Dudley, Goodsell) 661-669
Thirty-third meeting of the 158, 246, 292
Thirty-fourth meeting of the 533, 588
Andromeda nebula, Distance of the 143
Antoniadi, E. M., The size of the southern snow cap of Mars in 1924..... 659
Apparatus for descriptive astronomy classes, A new piece of demonstration, *Dinsmore Alter* 575
Asteroid 1923 (PE), Elements of the orbit of 140
1924 (TD) Baade's 71, 140
Ephemeris of 141
New elements of 210

Astronomers to attend the meeting of the International Astronomical Union, American 415
Astronomical conference at Yerkes Observatory 416
equipment stolen 273
lectures at Harvard 624
Union at Cambridge, The international, *E. W. Brown* 569
Astronomischer Jahresbericht 143
Astronomy, The public, and Science Service, *James Stokley* 595
University extension course in 275
Asymmetries in parallax programs, *Oliver J. Lee* 590
Atmospheric currents, *A. E. Douglass* 247
Aurora of August 22, The 567
Bailey, S. I., Joel Hastings Metcalf 493
Barrett, Storrs B., John A. Parkhurst 281
Bassett, Preston R., Shadow bands and searchlights 232
Beard, Leslie C., Novae (poem) 17
Bennot, Maude, Orbit of β GC 1036 306
Proper motions of forty stars (abstract) 537
Berg, Paul A., Creation (poem) 669
Binary stars, Rotational effect on the spectra of 76
systems, Photographic determinations of mass ratios in visual, *Harold L. Alden* 164
Bobrovnikoff, Nicholas T., Note on the spectrum of the periodic comet Tempel-2 (1925*d*) 638
Spectrum of Comet *c* 1925 (Orkisz) 417
Book Reviews—
A graphic table of logarithms and antilogarithms 568
